JOURNAL OF
NON-CRYSTALLINE SOLIDS

A journal on the chemical, electronic, optical and mechanical properties of glasses, amorphous semiconductors and metals, sol–gel materials, the liquid state of these solids and the processes by which they are formed

Editor: R.A. Weeks

Co-editor: D.L. Kinser
Nashville, TN, USA

Regional Editors:

G. Frischat, Clausthal, Germany

H. Fritzsche, Chicago, IL, USA

L.B. Glebov, St Petersburg, Russia

G.N. Greaves, Daresbury, UK

JNCSBJ MASTER INDEX VOLS. 171–180
August III, 1995 ISSN 0022-3093

NORTH-HOLLAND

The founding editor of the Journal of Non-Crystalline Solids is Professor J.D. Mackenzie. He served with great distinction from 1968 until 1988

Editorial Addresses

Editor: R.A. Weeks

(for complete addresses see page 2 of the preliminary pages)

Review Articles, Research Papers, Comments and Letters on chemical, electronic, optical, mechanical, structural and fracture properties of non-crystalline materials including glasses, amorphous semiconductors, metals (alloys) and sol–gel materials which form glasses, the liquid state of all materials from which non-crystalline solids can be formed, and the processes for the formation of non-crystalline solids are accepted.
Manuscripts should be submitted in triplicate, typed with double line spacing, and contain a factual abstract of 200 words or less. Original figures (*to be returned after publication*) should be included.
A restricted number of short articles of special interest will be published as Letters *within six months of receipt* by the Editor.
For more information see the Instructions to Contributors on page 3 of the cover.
Manuscripts should be sent to the Editor or to one of the Regional Editors. Letters should be sent to the Editor.

It is understood that a manuscript submitted to this journal has not been published elsewhere nor is it planned for such publication. Permission to reproduce published material in a manuscript is the sole responsibility of the authors.

Correspondence with the Publisher regarding articles accepted for publication or corrections should be submitted to: G.W. Anderton, Desk-editor NOC, Elsevier Science B.V. (North-Holland), P.O. Box 103, 1000 AC Amsterdam, The Netherlands. Tel: +31-20 5862 549. Telefax: +31-20 5862 775. E-mail: g.anderton@elsevier.nl. Telex: 10704 esp om.

JOURNAL OF NON-CRYSTALLINE SOLIDS is published in monthly issues. For 1994, 15 volumes (162-176, 45 issues) have been announced. The subscription price for these volumes is available from the publisher. Subscriptions are accepted on a prepaid basis only and are entered on a calendar-year basis. Claims for issues not received should be made within six months of our publication (mailing) date. If not, they cannot be honoured free of charge.

Journals are sent by surface delivery to all countries, except the following countries where SAL air delivery (Surface Airlifted Mail) is ensured: Argentina, Australia, Brazil, Canada, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, People's Republic of China, Singapore, South Africa, South Korea, Taiwan, Thailand, USA. Air mail rates for other countries are available upon request.
SUBSCRIPTIONS should be sent to the Publisher, Elsevier Science B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, The Netherlands, tel: 31-20 5803 642, telefax: 31-20 5803 598, or to any subscription-agent or bookseller.

Elsevier Science B.V.: All rights reserved. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the written permission of the publisher, Elsevier Science B.V., Permissions Department, P.O. Box 521, 1000 AN Amsterdam, The Netherlands.
Special regulations for authors – Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.
Special regulations for readers in the USA – This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. The fee indicated on the first page of an article in this issue will apply retroactively to all articles published in the journal, regardless of the year of publication. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

US mailing notice – Journal of Non-Crystalline Solids (ISSN 0022-3093) is published monthly except semimonthly in February, March, July, August, September, October and November, by Elsevier Science B.V., Molenwerf 1, P.O. Box 211, 1000 AE Amsterdam, The Netherlands. Annual subscription price in the USA is US $3531 (US $ price is valid in North, Central and South America only) including air speed delivery. Second class postage rate paid at Jamaica, NY 11431.
USA POSTMASTERS: Send address changes to Journal of Non-Crystalline Solids, Publications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Airfreight and mailing in the USA by Publication Expediting.

Special regulations for authors—Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Submission to this journal of an article entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and / or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A.—This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the Publisher for any injury and / or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

∞ The paper used in this publication meets the requirements of ANSI/NISO 239.48-1992 (Permanence of Paper).

Glass Formation, Neutron Diffraction 175 (1994) 211
Glasses Containing Transition Metal Ions, Mechanical Amorphization, Nitridation 176 (1994) 98
Short-Range Order 177 (1994) 81

Zirconia
Sol–Gel Method 177 (1994) 179

Les Houches Summer School Proceedings

Volume 54

Supernovae

Edited by **S.A. Bludman**, **R. Mochkovitch** and **J. Zinn-Justin**

1994 878 pages
Price: Dfl. 470.00 (US$276.50)
ISBN 0-444-81474-4

Volume 53

Fundamental Systems in Quantum Optics

Edited by **J. Dalibard**, **J.-M. Raimond** and **J. Zinn-Justin**

1992 xxxviii + 1123 pages
Price: Dfl. 457.00 (US$268.75)
ISBN 0-444-89736-4

Volume 52

Chaos and Quantum Physics

Edited by **M.-J. Giannoni**, **A. Voros** and **J. Zinn-Justin**

1991 xxxiv + 796 pages
Price: Dfl. 386.00 (US$227.00)
ISBN 0-444-89277-X

Volume 51

Liquids, Freezing and the Glass Transition

Edited by **J.-P. Hansen**, **D. Levesque** and **J. Zinn-Justin**

Part I: 1991 xxxiv + 504 pages
Price: Dfl. 254.00 (US$149.50)
ISBN 0-444-88927-2
Part II: 1991 xxxiv + 492 pages
Price: Dfl. 254.00 (US$149.50)
ISBN 0-444-88928-0
Set price: Dfl. 483.00 (US$284.00)

Volume 50

Oceanographic and Geophysical Tomography

Edited by **Y. Desaubies**, **A. Tarantola** and **J. Zinn-Justin**

1990 xxvi + 464 pages
Price: Dfl. 226.00 (US$133.00)
ISBN 0-444-88779-2

Volume 49

Fields, Strings and Critical Phenomena

Edited by **E. Brézin** and **J. Zinn-Justin**

1990 xxx + 642 pages
Price: Dfl. 267.00 (US$157.00)
ISBN 0-444-88440-8

Volume 48

Liquids at Interfaces

Edited by **J. Charvolin**, **J.F. Joanny** and **J. Zinn-Justin**

1990 xxxvi + 644 pages
Price: Dfl. 405.00 (US$238.25)
ISBN 0-444-88450-5

Volume 47

Astrophysical Fluid Dynamics

Edited by **J.-P. Zahn** and **J. Zinn-Justin**

1993 650 pages
Price: Dfl. 435.00 (US$255.75)
ISBN 0-444-81797-2

Volume 46

Chance and Matter

Edited by **J. Souletie**, **J. Vannimenus** and **R. Stora**

1987 xxxvi + 720 pages
Price: Dfl. 476.00 (US$280.00)
ISBN 0-444-87072-5

Volume 40

Relativity, Groups and Topology, II

Edited by **B. DeWitt** and **R. Stora**
xxxvi + 1324 pages (in 3 vols.)
Set price: Dfl. 485.00 (US$285.25)
ISBN 0-444-86858-5

Volume 39

Recent Advances in Field Theory and Statistical Mechanics

Edited by **J.-B. Zuber** and **R. Stora**

1984 xxx + 872 pages
Price: Dfl. 643.00 (US$378.25)
ISBN 0-444-86675-2

Volume 36

Chaotic Behaviour of Deterministic Systems

Edited by **G. Iooss**, **R.H.G. Helleman** and **R. Stora**

1983 xxxii + 710 pages
Price: Dfl. 515.00 (US$303.00)
ISBN 0-444-86542-X

Volume 35

Physics of Defects

Edited by **R. Balian**, **M. Kléman** and **J.-P. Poirier**

1981 xxxii + 858 pages
Price: Dfl. 608.00 (US$357.75)
ISBN 0-444-86225-0

SUBSCRIBERS TO THE SERIES ARE ENTITLED TO A 15% DISCOUNT OFF THE LIST PRICE OF EACH VOLUME.

Handbook on Semiconductors

Completely Revised and Enlarged Edition

Edited by **T.S. Moss**

It is now ten years since the publication of the first edition of the *Handbook on Semiconductors*. During this time there has been tremendous progress and the subject continues to be of major scientific and commercial importance. As before, this completely revised and enlarged edition of the Handbook is in four volumes, each having a separate editor who is an internationally recognised authority in his field. The comprehensive and up-to-date treatment makes the Handbook an invaluable reference source for all workers in semiconductor physics or device development, in university, government or industry, in the fields of electronics, optics, aerospace or computing. Simultaneously, the treatment is sufficiently basic for the Handbook to be well suited to undergraduate studies, in either physics or electronic engineering.

Volume 1

Basic Properties of Semiconductors

Volume edited by **P.T. Landsberg**

1992 xiv + 1204 pages
Price: Dfl. 595.00 (US$350.00)
ISBN 0-444-88855-1

Volume 2

Optical Properties of Semiconductors

Volume edited by **M. Balkanski**

1994 858 pages
Price: Dfl.525.00 (US $308.75)
ISBN 0-444-89101-3

Volume 3

Materials, Properties and Preparation

Volume edited by **S. Mahajan**

1994 2388 pages (in 2 vols.)
Price: Dfl. 1190.00 (US$700.00)
ISBN 0-444-88835-7

Volume 4

Device Physics

Volume edited by **C. Hilsum**

1993 1244 pages
Price: Dfl. 625.00 (US$367.75)
ISBN 0-444-88813-6

THE COMPLETE SET IS AVAILABLE AT A SPECIAL DISCOUNT PRICE OF: DFL.2495.00 (US $1467.50)

NORTH-HOLLAND

(AN IMPRINT OF ELSEVIER SCIENCE)

Instructions to Contributors

Original manuscripts may be submitted to the editor or any one of the regional editors. The author or authors must confirm that:

(1) the manuscript has not been published and is not being submitted to any other journal. If presented at a conference, the conference must be identified. If published in conference proceedings, substantial justification for re-publication must be presented.

(2) all necessary permissions for publication have been secured prior to submission.

(3) all authors have made a significant contribution to the research reported and have read and approved the manuscript which has been submitted. All authors take full responsibility for the published paper.

The authors are requested to personally sign a statement certifying the above.

A manuscript submitted to the Journal will have the following structure.

(i) **Abstract.** A brief reprise of the contents of the manuscript, containing specific results and conclusions.

(ii) **Introduction.** Justifications for the research, hypotheses to be tested by the experiments or theory, and a review of the literature relevant to be reported.

(iii) **Experimental Procedures or Constraints on Theory.** Information necessary for the reader to understand the significance of the data which will be presented in the Results section must be given, e.g., sample preparations, compositions, etc. Errors of measurement, random and systematic, should be described and the methods by which their values were determined given. A description of the limits of a theory or of modelling may be given.

(iv) **Results.** Data. Errors in experimental data must be given with the data. The basis for all lines drawn on a figure must be described, either in the text or in the figure caption. If significant maxima or minima occur in a spectrum and these are identified, the method by which the values of the peak positions were measured and the errors of the measurements must be given.

(v) **Discussion.** Development of the data's logical relations, relevance to prior research, and deductions from the data and prior research. If lines drawn on a figure are curves of some function fitted to the data, then the method of fitting and the quality of the fit must be given. The use of such phrases as "data may show...", "data probably indicate...", "it may be that...", and other such indicators of unsupported speculation are strongly discouraged.

(vi) **Conclusions.** Brief declarative sentences that state unequivocally the conclusions of the research. Extended repetition of the discussion is inappropriate.

Three copies of a manuscript must be submitted with original figures. **The manuscript must be typed with double spaces between lines.** Manuscripts may also be supplied in electronic form (on disk or by e-mail); please contact the Publisher for further details. Sections and sub-sections must be clearly numbered according to the Journal style. Line drawings should be drawn with India ink or a laser printer. The ordinate and abscissa must be labelled and units given for the scales. Letters and numbers must be 2 mm in height after reduction. Halftones, such as electron micrographs, must be submitted as high-quality prints or originals, and the top edge should be indicated on the back. Scale bars are preferable. Colour plates: Illustrations can be printed in colour when they are judged by the Editor to be essential to the presentation. The Publisher and the Author will each bear part of the extra costs involved. Further information concerning colour illustrations and the cost to the author is available from the Publisher. Figure captions will be listed separately from the figures. *Note:* Original figures will be returned after publication. References will be numbered sequentially and should be prepared according to the style requirements of the Journal (see past issues for examples of references of various types of publication). References should be listed at the end of the paper, after any appendices. On first use, all acronyms to be subsequently used will be spelled out, e.g., transmission electron microscopy (TEM). Acronyms will not be used in an abstract. Tables must be typed with double spacing on separate pages, have a brief descriptive title, and every column must have a title with units given in parentheses. Units must not change in a column. Tables will be numbered sequentially in the sequence of their appearance in the text.

Authors are requested to follow the recommendations of the Symbols and Units Nomenclature Commission of the I.U.P.A.P. (Physica 146A (1987) 1–68). Symbols of scalar quantities are printed in italics. Vectors are printed in bold italic type; these should be indicated in the manuscript by wavy underlining in the text and in formulae. Tensors are printed in bold sans serif type.

Contributed manuscripts will, in most cases, be reviewed by two referees. The comments of the referees and the recommendations of the editor and the decision on publication will be sent to the corresponding author. The corresponding author is requested to supply a full postal address, plus telephone and telefax numbers, and e-mail address (if available).

IMPORTANT: When page proofs of the accepted manuscript are made and sent out to authors, this is in order to check that no undetected errors have arisen in the typesetting (or file conversion) process. At the proof stage only printer's errors may be corrected. No changes in, or additions to, the edited manuscript will be accepted.

COMMENTS. Comments on published papers are welcomed and should be titled "Comment on (title of paper)". Authors will be given the opportunity to respond, and their response will be published with the "Comment...".

LETTERS. A Letter will have, nominally, 1000 words and three line drawings prepared in the same format as a contributed manuscript. A brief abstract is required. The structure of a Letter will be the same as that described above, except that section headings may be elided. Authors who wish to have letters considered for rapid publication must provide justification for such treatment. Letters judged by the editor to contain such justification will be reviewed by one referee within one week of receipt. The objective of the rapid procedure is to publish the Letter within approximately three months of receipt. Letters may be submitted by facsimile transmission to the editor. The original manuscript and line drawings for such letters may be submitted directly to the publisher. To ensure rapid publication, proofs will not be sent to authors.

REVIEW PAPERS. The editor will solict reviews in topics judged to be of current interest. Suggestions for topics by our readers and those who wish to prepare a review are welcomed. The editor will acknowledge all suggestions.

REPRINTS. Fifty (50) reprints of a paper will be sent to the first author without charge. An order form for additional reprints will be sent with the author's proofs. The order for additional reprints must be returned with the corrected proofs.

Control of Semiconductor Interfaces

Proceedings of the First International Symposium, Karuizawa, Japan, 8-12 November 1993

Edited by **I. Ohdomari**, **M. Oshima** and **A. Hiraki**

©1994 600 pages Price: Dfl. 325.00 (US$185.75) ISBN 0-444-81889-8

This book focuses exclusively on control of interfacial properties and structures for semiconductor device applications from the point of view of improving and developing novel electrical properties.
The following topics are covered: metal-semiconductors, semiconductor hetero-interfaces, characterization, semiconducting new materials, insulator-semiconductor, interfaces in device, control of interface formation, control of interface properties, contact metallization.
A variety of up-to-date research topics such as atomic layer epitaxy, atomic layer passivation, atomic scale characterization including STM and SR techniques, single ion implementation, self-organization crystal growth, in situ measurements for process control and extremely high-spatial resolution analysis techniques, are also included. Furthermore it bridges the macroscopic, mesoscopic, and atomic-scale regimes of semicondutor interfaces, describing the state of the art in forming, controlling and characterizating unique semiconductor interfaces, which will be of practical importance in advanced devices. Intended for both technologists who require an up-to-date assessment of methods for interface formation, processing and characterization, and solid state researchers who desire the latest developments in understanding the basic mechanisms of interface physics, chemistry and electronics, this book will be a welcome addition to the existing literature.

Contents: (*Please contact the publisher for a complete list of contents.*) Preface. Parts 1. Plenary (*2 papers*). 2. Metal/silicon (*8 papers*). 3. Semiconductor hetero-interface (*8 papers*). 4. Characterization (I) (*4 papers*). 5. Semiconducting new materials (*6 papers*). 6. Metal/compound semiconductor (*7 papers*). 7. SiO_2/Si (*6 papers*). 8. Characterization (II) (*4 papers*). 9. Insulator/semiconductor (*8 papers*). 10. Characterization (III) (*6 papers*). 11. Interface in device (*4 papers*). 12. Control of interface formation: Si (*7 papers*). 13. Control of interface properties: Si (*3 papers*). 14. Contact metallization: Si (*2 papers*). 15. Characterization: Si (*5 papers*). 16. Control of interface formation: compound semiconductors (*5 papers*). 17. Control of interface properties: compound semiconductors (*5 papers*). 18. Contact metallization: compound semiconductors (*8 papers*). 19. Characterization: compound semiconductors (*8 papers*). Subject index.
